

Abhishek Singh

Senior Frontend Architect: Building
Scalable, High-Performance Web
Applications

BONJOUR!

I'm a multi-specialist Front-End developer with 7+ years of experience in Health Care, Construction , E-commerce & Logistics and information & Technology domain.I focused on the design and implementation of enterprise scaled business solutions. I have hands-on experience of designing, developing and troubleshooting large scale driven, multi-threaded applications.

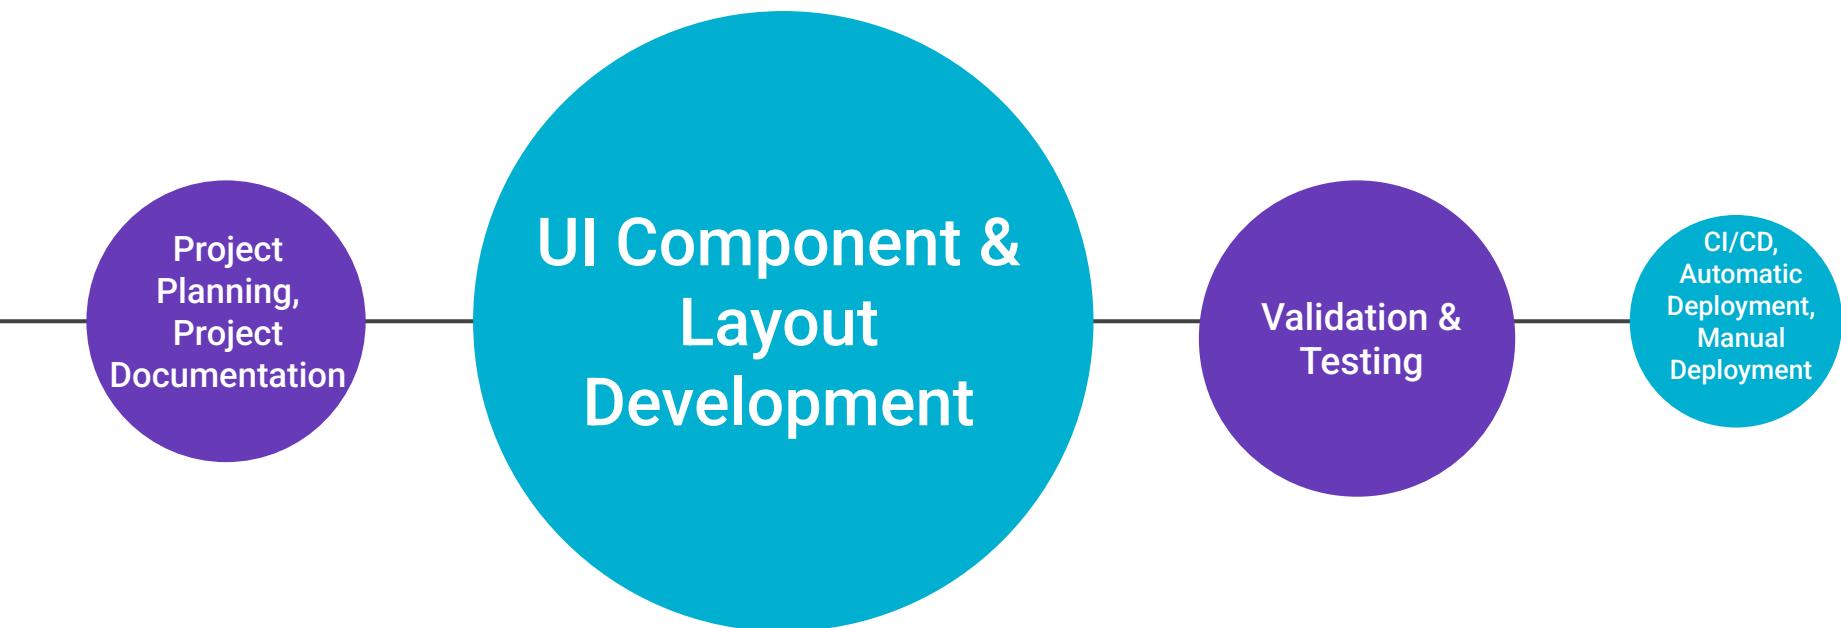

About me

My name is Abhishek Singh , 29-years-old , multi-specialist Front End Engineer based in Gurgaon.I work as a bridge between graphical design and technical implementation, taking an active role on both sides and defining how the application looks as well as how it works. I work with the UX designer and backend team to build responsive design web applications and manage projects by collaborating with mentors. I also assure that all user input is validated before submitting to back-end. I work as a bridge between the front end and back end code to consume restful web API,Asynchronously data from back end.

I grew up in Ballia(UP), am a Traveller, and I'm excited to partner with you!

Professional Background

The main areas of my expertise are Front-end Development . I have worked with a number of high profile clients (both directly and indirectly) , comfortable working under pressure to complex specifications.I have a thorough understanding and solid experience of the software development lifecycle process. I have worked in developer roles that utilized agile and waterfall methodologies. I also have experience collaborating in large scale projects with globally dispersed teams, including both on and off shore development
